## Dare to Dream

The most unlikely events can be the most pleasant surprises. Like two perfectly settled and satisfied IT professionals setting up a school. It was destined to be superlative, since profit was never a motive but passion was. Sapna & Nitin Katiyar, both accomplished professionals, had been nurturing a dream of a school where kids could just be kids and not rote machines, creativity is nurtured and not killed, there are no boundaries for learning and trying new ideas and kids breathe in a free flowing, energized environment.

It is a school of the 21<sup>st</sup> century where everyone is inspired to learn and come there because they love it and not because they have to. That in brief is the genesis of The Achievers School that took its first baby step in 2008, safe and secure from day one; bubbling with energy, wonderful workable ideas and grit to make it through, the school has grown from strength to strength. It is committed to provide the best quality education to kids of Nagpur and mentor them to be versatile human beings by exposing them to various walks of life, global best practices and innovative initiatives thus get them ready to take up challenges of life.

Backed on dedication, quality orientation, hard work and passion for education, The Achievers team, once a dream of just two people, is today, a large family comprising Children, Parents, Staff and Associates, that is learning and growing by leaps and bounds. With several milestones covered & feathers to their cap the dream & expectations are now far beyond the horizon.

I love Mathematics and I love children. I believe that every child is unique and can be mentored to give her/his best. A child's education is complete only when it is Holistic. It should give importance to Academics, Art, Sports, Co-Curricular Activities, and Values. It should also teach children Life Skills which is an inseparable part of human life.

The start of my career as a Kindergarten Head gave me an understanding of 'The Toddlers' world. The 24 years that I spent as a Mathematics Teacher, made me aware of the different learning styles. My Ph.D. in Interdisciplinary Studies gave me an insight, into the needs of the students, of different age groups.

The experience, awareness, and insight which I gained, based on the various responsibilities that I was conferred upon, helped me in designing the Learning Path of the students, when I took up the role of Director Academics and Principal, at The Achievers School.

I am able to bring my ideology into practice by following the Five Petal Approach in my school. At 'The Achievers', students spend their maximum time in Academics. They spend sufficient time learning an art form and a sport of their choice. They also get time to learn values through the CCA. Life skills are learnt through the School Cinema program and Clubs. Thus the time spent at school is distributed so as to achieve the desired goals.

Being in the Education Sector gives me a different level of satisfaction. Very rarely a person gets to live one's passion as one's profession. If getting that counts as luck, I consider myself the luckiest person on earth. I believe it's a privilege to be a mother to so many. It gives me a place in every child's life which makes me feel eternal.

# Achievers Advantage

## The School of Tomorrow...

### Nurturing 21st Century skills

- Multiple Intelligence
- Creative Thinking and Problem Solving
- Collaboration and Communication
- Self-Learning and Growth Mindset
- Global Leadership
- Socio-Emotional Intelligence
- Life Skills and Human Values
- Laptop and Internet access to each child

### Building Strong Foundation

- Multidisciplinary Knowledge
- Experiential Teaching Methodology
- STEAM Education (Programming, Robotics, Tinkering etc.)  
(Science | Technology | Engineering | Art | Mathematics)
- Focus on Concept Understanding and Its Application
- Specialize in Sport and Art for Life
- Master Skills by Rigorous Practice
- Learning Beyond Curriculum at One's Own Pace
- Outward Bound Learning

### Offering Conducive Learning Environment

- Child Centric Approach - Personalized Study Plans
- Ideal student and staff ratio
- Trained, Experienced and Highly Evolved Mentors
- Right Balance of Academic & Co-Scholastic Activities
- Valuing Student and Parent Feedback
- Safe and Stress-Free Learning Environment
- 6 Acres World Class Green Campus
- Reasonable Fee Structure

# Vision

Mentor each child to be an Achiever in life

# Mission

Our mission is to Inspire, Encourage  
and Guide our students to...

# Achievers Philosophy

Current times are defined by rapid changes being driven by technology and innovation. Preparing children for a different tomorrow means that they need to be educated differently today. It is at the core of the Achievers' philosophy, and since 2008, we are educating children for Tomorrow and not for Today.

The Achievers School is a vanguard school in 21st-century education, offering the CBSE curriculum coupled with world-class experiential learning methodologies. Children are at the centre of our universe, and we endeavour to provide a personalized learning experience to every child.

We at Achievers channelize their energy and motivate them to discover and nurture their multiple intelligences to the best of their potential. We encourage children to learn concepts, understand their real-life implementations, and grow up making their discoveries & decisions.

We create a community of teachers, parents, friends, and society around students for instilling values, developing life skills, and ensuring complete wellness (body, mind & soul) of the child, which is essential for the future. In this community, we encourage students to compete with themselves rather than competing with others and build their future on the strong foundation of their thoughts, creativity, talent, and communication.

## Educating for Future, Not for Today

Nurturing 21st Century Learners since 2008

JOIN US

## Educating for the Future, Not for Today

Current times are defined by rapid changes being driven by technology and innovation. Just as the environment of today was inconceivable a decade ago, the future that the children will grow into can hardly be foreseen. Preparing children for a different tomorrow means that they need to be educated differently today.

## Focus on how to learn rather than what to learn

In the fast-changing world of the 21st century, the world is experiencing multiple disruptive changes frequently, and hence to adapt to these changes, a person needs to keep learning and acquiring new skills throughout his life rather than just once.

“

Competition is core to life; what matters is, with whom to compete and how. At Achievers, we encourage our children to have fierce competition with themselves rather than with others. We instill the habit of reflection and refinement right from day one. All children are challenged continuously as per their potential and given opportunities to stretch themselves further.

”

# Experiential Learning Methodologies

Experience is the Best Teacher

JOIN US

In today's world, knowledge is easily accessible to all, so it does not matter what you know; rather, what you do with your knowledge, matters.

This concept is at the core of educational planning and delivery at Achievers. Based on our research and the collective experience of our team, we have developed a set of experiential learning processes that are adaptive to the learner's profile and customized to each area of intelligence. They are designed around the process of Design thinking (FITS) and encourage children to...

## EXPERIENCE is the best TEACHER

- Understand the concepts rather than memorize them.
- Apply the concepts for finding solutions to their queries and challenges.
- Be positive and develop a problem-solving attitude instead of a complaining one.

We believe that the best way to learn something is to "Do it."

## Along with Academics, one Sport and one Art for Life

Humans are born with the potential to excel in multiple areas. We usually concentrate on just one of them, but if we remain focused and use the right learning process, then each one of us can excel in multiple areas of intelligence. We believe that all types of intelligences, skills, and knowledge are equally important.

## Humanities

Humanities are vital knowledge areas for success in life as they form a solid base for utilizing or applying the STEM knowledge to bring a positive change in the lives of the people around us.

"Humanities give the right direction to Science."

## STEM

STEM includes Science, Math, Technology & Engineering. It helps to develop logical and analytical skills, helps us to understand the reason and mechanics of various things in life. At Achievers, we have realized that in the future, along with Science and Math, technology and engineering are going to be essential, and hence we train our children in these skills right from class 1. Along with experts from the industry, we have developed a practical, hands-on curriculum for the same.

"STEM is a way of thinking, much more than a body of Knowledge."

## Wellness (Sports)

We all understand that it is essential to be physically strong to be successful in life. Children love to play sports; we just need to allow them to play and provide the required resources.

"A Healthy Mind resides in a Healthy Body."

## Life Skills

Life skills are essential areas of intelligence, and as per various studies, around 87% of our success in life depends on them.

"Life skills are what make us human."

## Arts

Art is a very different and exciting area of intelligence. It helps us to develop our creativity and provides us a medium to express ourselves to the world differently. Art is an excellent stress buster and can very well act as our career or hobby in life. Considering the future, where we humans will have more leisure time and stress as compared to today, every child must learn at least one Art form to keep himself positively engaged.

"Art is something which makes you breathe with a different kind of happiness."

# Personalized EDUCATION

## Personalized Development Plan

Personalized Development Plan is an educational approach that aims to customize learning for each student's strengths, needs, and skills. Each student gets a "learning plan" based on what the student needs to learn and what he knows. It is the opposite of the "one size fits all" approach used in most schools.

## Special Hobby & Sports

We firmly believe that, along with academics, every child should acquire skills in One Sport and One Art for Life. On the one hand, they improve the quality of life and complement academic learning as they develop the overall personality of students. Proper implementation of sports and hobby curriculum guidelines inculcates qualities like discipline, leadership, team spirit, competitiveness, time management, among other qualities. It helps them to positively use their free time, manage their stress, and be physically fit.

## CLUBS

Robotics | Tinkering | Dramatics | Literature | Seva

Children explore new horizons freely based on individual potential. This is an essential element of education at The Achievers School. Our Club based learning programme provides an opportunity for each child to explore new areas of intelligence beyond the boundaries of the syllabus and explore them without any limits as per their comfortable pace of learning.

# Learning Beyond the Classroom

At Achievers, learning is not confined to classrooms or the school campus only; it frequently extends beyond too. We have a well-structured schedule of outbound learning for all children, which includes multiple educational trips, one-day outings, one-night stay trips, and multi-day trips to various locations.

# LEARN

Anywhere Anytime

# Social Initiatives

"The best way to find yourself is to lose yourself in the service of others."

The Social Service – SEWA activities are designed to help students acquire 21<sup>st</sup> century skills while students create meaningful change in the world around them. We encourage our children to articulate their ideas for a better world and to put them into action.

Teachers inspire and continuously guide children to be

- RESPONSIVE to the world around them
- PLAN a viable SOLUTION
- Take OWNERSHIP and ACT
- INSPIRE others and create a POSITIVE IMPACT

Social  
Initiatives

# Competitions

Competitions offer a chance to students to gain substantial exposure to benchmark themselves at the city, state, national or international level. Students get an opportunity to showcase skills, analyse, and evaluate outcomes.

The experience of this exposure improves the personal aptitude of a student. Competitions also encourage students to adopt innovative techniques and develop their ideas and skills.

“Compete to Learn  
rather than to Win.”

Inter-School | Impact | Sportathon | Intra-School

# Achievements of Our Young Achievers

Being known for rendering quality education for over a decade, the school also has an impressive list of awards to its credit.

Singing-Abhang Gayan Spardha Winner

Basket Ball-Division Winner

Basket Ball-Inter-School Winner

Skating-DSO Winner

Table Tennis-DSP Winner

Drawing-Inter-School Winner

Basketball-Inter-School Championship

Dance-Akhil Natrajam Antar Sanskrutik Sangha Nagpur

**Aarya Deshpande**  
Inter School State Level Basketball Championship, Akulj

**Punit Dambale**  
Inter School Divisional Level Skating Competition

**Vidhi Gagde**  
Represented Maharashtra Team In School Games Federation of India

# Teachers

(Caring and Compassionate)

We as teachers, in whose care you place your child's early learning, take things forward; wearing several hats on the way; that of a guide, friend, & sometimes even of a parent and remain with them at every step of the way, facilitating new experiences, opening windows to the new world for them.

Education is the best gift one can give to a child. Edushield is our commitment towards the education of our children in times of need. Edushield safeguards a child's education from getting interrupted by unfortunate events or circumstances of life.

As part of this program, in case of unfortunate events like death of the primary earning member of the child's family, the child's tuition fees payable to 'The Achievers School' will be waived off till he/she continues his/her education from 'The Achievers School'

Safety First

Green Campus

We are committed to providing a secure and stress-free environment with professional resources to make learning a fun and continuous process, thereby accomplishing our goal of mentoring each child to be an achiever in life.

Our school is not just four walls, but it is a Learning campus, where everything inspires children to learn and grow. It is designed by one of the world's best architects with the sole objective of providing a conducive learning environment and international standard resources required to enhance the learning outcome of 21st-century learners.

The campus is designed on the concept of Small Learning Communities (a small area dedicated to each age group) where each child feels secure and homely instead of the 20th Century design model of the "Cell & Bell" model. Each community caters to the needs of the specific age group of children and is incorporated with resources required for the development of multiple intelligences in the child using experiential learning methods in the areas of Humanities, STEM, Sports, Arts, and Life skills.

The safety and security of the children is built into the campus design. Multi-level physical security is designed in the campus with separate administration and academic buildings. The campus has complete coverage of IP cameras and firefighting equipment with dedicated surveillance and control room.

Our iconic learning campus is spread over 6 acres of land. It is a green campus with 350+ trees, facilities like sewerage treatment plant, rainwater harvesting, solar power plant, wet and dry waste management, which provide a pollution-free environment for the teaching-learning process.
